to whom it may concern: we wish to urge you to reject the NAB'spetition
04-160. since we pay for xm radio we dont understand how anyone can tell a company
what they are allowed to broadcast and what they arent. we would like to know the
weather and taffice before we get to the area not after we're already there. we are
both truckers and this service is very valuable to us . since you dont tell
cable,disk,or satellite tv what they are allowed to program how can you begin to
think you can tell satellite radio what they can.xm provides a service which local
radio stations can not thank you for your time
